ACC Citri-Solv

PRODUCT DESCRIPTION: A remarkable orange-based, high flash point solvent blend that effectively dissolves adhesive residue off of forms as well as removing retarder residue. Citri-Solv has grease cutting solvents and penetrants, as well as anti-deposition agents. It effectively degreases and cleans a variety of surfaces and equipment without etching.

AREA OF APPLICATION: Apply ACC Citri-Solv to metal, plastic, vinyl, concrete, brick, tiles or other masonry surfaces and equipment to be cleaned.

DIRECTIONS: Do not dilute Citri-Solv for best results. Apply by brush, roller or by low-pressure hand pump sprayer. Before trying to remove in-form retarder make sure the retarder film is completely dry. Allow Citri-Solv to dwell for a few minutes without drying on the surface; gentle scrubbing with a stiff brush may be necessary after application of the solvent. Wipe area clean with rags or sponges re-apply as necessary.

TECHNICAL DATA: Appearance and odor: Clear solution with mild orange odor. Specific Gravity: 0.8. Solubility in water: insignificant.

SHELF LIFE AND STORAGE: 1 year from manufacturing date in closed original container.

PACKAGING: 5-gal steel pails, 55-gal steel drums

SAFETY: Flammable liquid. Keep away from heat, sparks and open flames. Use respirator for spray applications. Do not dispose in sewer. Obey all local regulations for disposal.

SHIPPING CLASSIFICATION: UN1263, Paint Related Material, 3, PG:II
